
Founder and CEO of Sabr Research, an AI-driven quantitative investment firm dedicated to principled, long-term investing within a fully Shariah-compliant framework. As the first fund of its kind, Sabr Research merges cutting-edge machine learning methodologies with uncompromising ethical standards. Previously, Cheikh was a Senior Quantitative Researcher at Five Rings Capital, a leading Wall Street proprietary trading firm, where he designed mathematical models for systematic investing. He holds two Master's degrees in Applied Mathematics and Financial Mathematics from École Polytechnique and the Massachusetts Institute of Technology (MIT), respectively. Cheikh is also the President of TerangaMath, a non-profit organization committed to advancing mathematics education and talent development in Senegal.

About NACIF

The purpose of the North American Conference on Islamic Finance (NACIF) is to foster the sharing of global knowledge. It is
