Co-Founder and CTO of Sabr Research, an AI-driven quantitative investment firm dedicated to principled, long-term investing within a fully Shariah-compliant framework. As the first fund of its kind, Sabr Research merges cutting-edge machine learning methodologies with uncompromising ethical standards. Previously, Mehdi was a scientist at Amazon where he designed end to end AI systems, driving billions of dollars in revenue and impacting 100+ millions customers worldwide. He has consistently delivered high-impact technical solutions across three major tech companies, published research in top tier optimization journals and holds two Master's degrees in Applied Mathematics and Machine Learning École Polytechnique and ENSAE.

About NACIF

The purpose of the North American Conference on Islamic Finance (NACIF) is to foster the sharing of global knowledge. It is
