candidate in Innovation in Global Development at Arizona State University's School for the Future of Innovation in Society, with an expected graduation in 2026. He holds a Master of Science in Social Entrepreneurship from the University of Southern California and a Bachelor of Science in Earth Sciences from King Fahd University of Petroleum and Minerals. His research focuses on participatory development models, indigenous sustainability, and the integration of Islamic principles into contemporary development practices. He has presented at international conferences, including the Society for Social Studies of Science (4S) conference and the International Islamic Economics and Finance Conference for Sustainable Development (IFESDC). Yaser's professional experience includes roles in social innovation consulting, sustainability research, and youth development programs.

.

Finance (NACIF) is to foster the sharing of global knowledge. It is an international forum for Islamic finance scholars and practitioners to discuss and collaborate on the various innovative practices that are being used in the Islamic finance industry. Ultimately, the goal of NACIF is to facilitate sustainable finance practices that benefit society at all levels.
